

**Working Towards Financial Stability** 

# **VACANCY NOTICE**

Non-Bank Financial Institutions Regulatory Authority (NBFIRA) invites suitably qualified individuals to apply for the following vacancy:

## Manager - AML/CFT

#### Reports to: Deputy Director AML/CFT Main Purpose of the job

The primary purpose is to oversee and manage non-bank financial institutions' risk assessments and compliance programs related to AML/CFT/PF. This includes ensuring that non-bank financial institutions adhere to regulatory requirements, implementing effective risk management strategies, and conducting regular audits and reviews to identify and mitigate potential risks.

#### **Duties and Responsibilities**

- Act as a key consultant to internal stakeholders on matters related to AML/CFT
- Mentor the team to ensure that they can deliver high quality effective supervision work and in an efficient manner
- Manage relationships with high level senior officials of licenced NBFIs
- Amendments to the legislative and regulatory framework applicable to supervised institutions, in line with international standards and best practice
- Development and review of surveillance manuals, procedures, business and market conduct rules for supervised NBFIs
- Technical inputs to consumer education programmes

Conduct the following supervision activities for licenced NBFIs in order to ensure strict compliance AML/CFT laws and regulations:

- Planning of supervision work
- Evaluation of institutional risk assessments
- Risk profiling and off-site risk-based supervision and monitoring of regulated entities
- On-site inspections and examinations of regulated entities
- Organisation and conduct of bilateral meetings, industry meetings and consultations
- Periodic reporting on supervision and compliance of regulated entities for dissemination to key internal and external stakeholders
- Handling of complex AML/CFT related customer complaints as escalated by the responsible Department
- Preparation and submission of non-compliance reports for investigation.
- Interpretation of FI Act and its regulations
- Reporting on Follow Up Report to relevant institutions as applicable.
- Maintenance of good working relationships with key internal and external stakeholders on issues of mutual concern. Active participation on National AML/CFT matters as may be
- required.

### **Qualifications and Experience**

- At least a Master's in Economics, Finance, Statistics, Actuarial Science, Business or related fields from a recognised institution
- At least 8 years of similar experience post-qualification in financial regulation with experience in AML/CFT, this must include a minimum of 2-3 years in a comparable line management position
- Professional Certification in AML/CFT regulation from a recognised body/Association

## Specialised knowledge and technical skills

- Regulation of financial sector
- AML/CFT regulation: rules, processes, techniques, best practices, etc.
- Relevant Financial Services Laws
- Proficient in the use of computers and software relevant to the position

#### **Competencies**

- Ability work to under pressure
- Conceptual and practical thinking
- Customer focused
- Decisive and assertive
- Professionalism and adherence to good work ethics
- Resilience, personal drive and self-motivation
- Results and performance driven
- Team player
- Interpersonal skills

## **Data Management Analyst**

### Main Purpose of the job

To ensure the efficient collection, processing, validation, and analysis of data received from Non-Bank Financial Institutions (NBFIs), to ensure accurate and timely insights to support regulatory oversight, policy formulation, and strategic decisionmaking.

#### **Key responsibilities**

- To develop business intelligence content that support and improve the Authority's processes.
- Development of reports and visualisations from the user requirements.
- Development of Dashboards for different levels of the organisation. Make regular follow-up with the NBFIs to submit the data on
- time and in the format required. Data aggregation, merging and summarisation where
- required.
- Data re-coding based on rationalised code lists where required.
- Data validation and cleaning using edit specifications.
- Conduct checks and verifications on the data for completeness, accuracy, coherence etc.
- Research and apply best practices in own specialised area of work and maintain high level of knowledge in order to effectively undertake the duties of the post.
- Proactively anticipate and implement alternative ways to meet commitments when unexpected events, unplanned actions, or contingencies arise.
- Perform any other duties as required which are commensurate with the position.

## **Qualifications and Experience**

- At least a Degree in Statistics, Information Technology, Data Management, Business Analytics or related qualification from a recognised institution.
- Professional qualification and or certification on Data Management from a recognised body.
- Experience in working with business analytics and intelligence tools (E.g. Power BI, Tableau, etc)
- Experience with working with databases
- At least 3 4 years of similar experience post-qualification.

## **Skills and Competencies**

- Data management practices and tools
- Proficient in the use of computers and software relevant to the position
- Methodical and organised, attentive to details
- Ability to work under pressure and meet deadlines
- Conceptual and practical thinking
- Customer focused
- Ability to work independently with minimal supervision
- Team player
